

GREENS OF SOHAM

Thursday, 26 March 2020

Following the Prime Minister's announcement on the 23rd March that the country is to enter a period of enforced isolation and stringent social distancing measures, we would like to confirm what we have been doing over the last few weeks to ensure the wellbeing of our employees, our customers, our growers and suppliers.

- Since early March, we have been operating with minimal interaction between colleagues and also third parties and that will continue.
- All administrative staff have been working from home.
- Our tractor drivers, grading staff and operational teams have all been issued with PPE and sanitizing equipment.
- We have new measures in place for goods in and out as well as with haulage operators.
- All site managers are ensuring a good distance between themselves and colleagues and also using PPE provided to them.
- All scheduled visits have been postponed. (We would ask anyone wishing to visit any site, to call and speak to the relevant manager).

This is of course a difficult time for all industries, but we are determined to ensure that we continue to meet demand to keep produce supplied to our customers and with the continued support of our fantastic teams of people will meet these needs.

On behalf of the Company, I wish everyone well.

Yours sincerely

William Shakeshaft
Managing Director
